

**reduced order modeling new approaches for computational** -  $w_1$  is the time response of the system to a unit impulse applied at time 0 and  $w_2$  is the time response of the system to an impulse of twice unit magnitude at time 0 these response functions represent the memory of the system if the system is linear then  $w_2 = 2w_1$  and  $h_1 = w_1$  which is why the first order kernel is referred to as the linear unit impulse response
